DAFI - taste matters

Water is the source of the taste of beverages and meals that we prepare on its base. Dafi water filter improves the taste of drinking water, and thus makes all your meals and drinks delicious.

With Dafi water filters you will discover the true taste of water which is undisturbed by pollution as well as beverages and meals prepared from filtered water. Dafi filter removes effectively anything that interferes with its flavor – like; heavy metals (lead, copper), chlorine, or a lime scale and lets you enjoy the pure and tasty water.

DAFI - the highest quality

Filter jugs

Timely exchange of filter ensures the best quality of filtered water.

Sliding lid with manual exchange reminder.

Sliding lid with electronic exchange reminder. Easy reset thanks to smart button.

Easy filling lid with manual exchange reminder.

LED sensor = more filters sold annually to one jug.
User will never miss filter exchange date.

LED sensor indicator with built-in motion sensor indicates the status of the filter every time the jug is lifted. If the LED lights up in blue - your filter is good. If the LED lights up in red - the filter should be replaced. The LED starts flashing in red automatically when filter exchange is required.

Filter exchange indicators

Blue light -
your filter is still good for use

Red light -
change your filter

Thanks to advanced technology, Dafi filters soften tap water and remove mechanical impurities, heavy metals and chlorine – all of which disturb natural taste of water. A properly selected filtering mixture allows improvement of approximately 150L - 200L of water - depending on its quality. Monthly replacement of the filter optimizes the filtering process.

dafi classic

filter provides up to 150 liters of crystal clean water.

easychange

EASY-CHANGE is a system that facilitates the exchange of the CLASSIC filter.

Dafi classic fits to Brita® classic

AQUAMAG^{Mg²⁺}

MAGNESIUM FILTER

Mg²⁺

Mg²⁺

Magnesium
is an element of life

- try to include it in your daily diet. This mineral reduces stress, lowers blood pressure, improves learning processes, prevents atherosclerosis and cardiac arrhythmias.

Magnesium filters

Magnesium water filters:

- + filtered water enriched in Magnesium
- + Magnesium decreases the level of stress
- + gives you the energy
- + improves taste of filtered water
- + one can enjoy true taste of tea, coffee, other drinks and cooked food
- + efficient reduction of water hardness
- + removes odor and taste of chlorine from tap water

Especially for:

- + people with active lifestyle
- + tea and coffee drinkers
- + pregnant women
- + breast-feeding mothers
- + hard workers
- + stressed people

Water full of flavour and health

Magnesium filters not only ensure effective water purification, but also enrich it with magnesium, which is the basis of a healthy diet and keeps your body in balance.

Magnesium is needed for life just as the water. So why not combine and drink water enriched with this bio element? Dafi brand offers such a solution to its customers, with the Aquamag filters whose filtering bed has been enriched with magnesium ions. By using them in the kitchen, you can not only clean the tap water and remove chlorine, but also enrich it with magnesium. Thus coffee, tea, juice or food prepared on the basis of filtered water will become even tastier, and above all, be a source of magnesium in the daily diet.

The human body absorbs best magnesium from the water just because the water does not pass through the complicated processes of digestion. While drinking filtered water through the Aquamag filters, you can be sure that magnesium deficiency would be levelled every day. This should avoid the states of fatigue, depression, muscle spasms, cardiovascular diseases, etc.

AQUA Balance pH⁺

takes care of the proper pH of your body

In order to meet dietary needs of the society of the 21st Century Dafu company has developed a new water filter. **Dafu Aqua Balance pH⁺** has a unique feature; alkaline tap water through a special ceramic bed. In addition the filter **Dafu Aqua Balance pH⁺** has the ability to reduce the chemicals in tap water.

Dafu Aqua Balance pH⁺ water filter is a simple and affordable solution for comfortable obtaining of water with the highest qualities of health and taste.

Alkaline filters

Features of Dafu Aqua Balance pH⁺ filters

- ALKALIZING**

"Modern" diet consists mainly of food products, acidifying the body. This is the meat and meat products, white flour, coffee, alcoholic beverages, pasteurized juices, fish and seafood, breads, rolls, sweets, eggs, soda, etc. Alkaline products list consist mainly fresh fruits, vegetables, and possibly non-carbonated mineral water (but not all kinds of water), etc. It is therefore clear that the maintenance of normal acid-alkaline balance with a common diet is a difficult task. A deficiency of alkaline substances increases the acidity of the body and lowers the alkalinity of the blood. The body then tries to remove the acid generated during metabolism with the urine, sweat and exhaled air and to neutralize it. Consuming the recommended amount of fluid (about 1.5-2 liters per day) in the form of filtered alkaline water helps in neutralizing acids in the body.
- ANTIOXIDANTING**

Alkaline water should be used when symptoms of diseases such as cold, flu or bronchitis, that is, when evidence of growth of acidity is produced in the organism. As in the case of vitamins C and E and beta-carotene, alkaline water acts as an antioxidant because it is rich in free electrons. It helps prevent heart disease, immune system disruption and many other diseases, in which the substrate is acidification. Such water helps get rid of toxins from the body, and thus to maintain proper metabolism. Alkaline water is often used by people with diabetes, or those with high blood pressure.
- FILTERING**

The "Aqua Balance pH⁺" filtering cartridges have in their composition an activated carbon, which has an excellent ability to remove chemical contaminants that may be present in tap water, especially chlorine and some heavy metals.
- ABSORPTIVE**

The "Aqua Balance pH⁺" filters alkalize water and change its structure in such a way that the particles form smaller aggregates. In this way the water is very well absorbed by the digestive tract.
- MINERALIZING**

Filtered water "Dafu Aqua Balance pH⁺" contains minerals in an ionized form, which ensures their absorption.

FLAVOURED Tap water filtered through the "Dafu Aqua Balance pH⁺" filter due to its purification of substances, such as chlorine and impurities precipitated from the water supply system, gains a better taste for its consumption and is not only useful, but also enjoyable every time you want to quench your thirst.

NEW

Best product for filtering and serving freshly filtered water

Hinged tab opens automatically under the pressure of water flow, allowing to fill a jug without removing the cover.

LED sensor indicator with built-in motion sensor indicates the status of the filter every time the jug is lifted. If the LED lights up in blue - your filter is good. If the LED lights up in red - the filter should be replaced.

Water filter glass jugs

Dafi glass filtering jug is made of borosilicate glass. It is characterized by high thermal and chemical resistance, defined by the ISO 3585 Standard.

Dafi glass jug is very much environmentally-friendly and in terms of environmental protection it is absolutely faultless.

NEW

Made of high quality glass, the Dafi carafe for water is a convenient accessory for all users of filter jugs, and more.

Equipped with lid preserves freshness, protects our drink from unwanted odours and external impurities. In order to match our carafe to the needs and tastes of our customers, the lid is available in different colours.

A unique style and an innovative solution - our carafe has all the attributes of a perfect product. Its functionality and ease of use makes preparing your favourite drink very simple.

Slim and carefully manufactured, will certainly find a place in a modern dining room, as a table decoration. A lack of tasty drink will never happen to you. Just pour the water from Dafi filter into carafe, add lemon and / or other additives such as mint or juice and a refreshing beverage is ready.

Easy filling

Firm grip while serving

Stable base

Water carafe

3 steps with dafi

Just **three steps** will provide you with a tasty and healthy drink based on **filtered water**.

1 Pour tap water into the Dafi filtering jug. After a while it will become clear and tasty.

2 Pour filtered water into the Dafi carafe, which has been created so that serving fresh water and your favourite drinks on its basis would be comfortable.

3 Add filtered water to the Dafi carafe, fresh juice from Dafi squeezer and your favourite herbs or fruits.

Healthy and fast

Water Express is a power saving and convenient device. It allows you to heat the exact amount that you need at the moment. You decide how much boiling water you want to pour into a cup or a teapot. Waiting for hot water lasts only few moments and filtered water provides tasty and healthy drinks every day.

Cost-effectiveness and comfort

Water Express is an innovative solution which will revolutionize the kitchen daily life. It combines the technology of filtering water with a heating system based on water flow heaters. Treated by the filter, water is quickly heated, guaranteeing perfect flavour and fast preparation of drinks. With Water Express you don't have to wait for the water to boil – just place a cup under the dispenser and push the button to make tea or coffee.

With Water Express you can have different kinds of water for different occasions

Cool and clean water
always within your reach

Water ideal for making
green and white tea

Boiling water available
immediately

Setting panel allows you to set a desired water temperature and an amount of water.

The LED sensor reminds you of prompt filter change.

3 different settings

1. Clear, tasty water - thanks to the **Dafi Unimax filter** inside.
2. Protection of heating element - thanks to softened water by the **Dafi Unimax filter**.
3. Fully reliable functioning of Express Water is ensured only by **Dafi Unimax filter**.
