

Its compact size and powerful performance levels make **Jclass** a standard-bearer for efficiency and practicality.

Wide range, maximum versatility

Available in two models – counter-top and under-counter – to fulfill various usage requirements.

Unlimited water

Two options available – 30 and 45 litres per hour – to suit many different applications: offices, bars or homes.

Water to suit all tastes

Room temperature, chilled (still or sparkling) or hot water up to 98°C, is dispensed from the tap straight into your glass.

Cutting-edge technology

Ice-bank cooling and cold carbonation technology offers optimum performance within a compact space.

Filtration

The taste and smell of the water can be improved by fitting filters capable of removing sediment and chlorine.

Professional water dispensers for small-scale applications

jclassTOP

jclassIN

OPTIONAL

The result of combining power, compact dimensions and technology.

White Silver/Black Grey

Elegant, functional and compact
Jclass Top may be placed on any worktop, or used with the specially coordinated cabinet.

Hygiene
The dispensing area is protected from environmental pollution and the controls are situated well away from the dispensing point.

Maximum safety
The safety valve prevents flooding caused by accidental faults inside the machine.

Plus-optional

Electronic control
For programming and monitoring functions.

Cu⁺ Safepath
Through the use of this application, the cooler is free from bacterial contamination. Available on all versions, with exception of H and Super Hot.

All the advantages of the counter-top model in a space-saving version.

Recommended filters

F-CAL
Customized chlorine purifier filter, bacteriostatic, descaler with shut off head

F-MICRO
Customized anti-bacterial micro-filter, with shut off head

F-SOFT
Ion exchange resin purifier for hardness reduction, with shut off head

F-AC
AC Chlorine filter/purifier with head and shut off valve

F
AC chlorine filter/purifier with head and shut off valve. Optional UV lamp, electronic water meter and electronic timer

FC
Multilayer + active carbon filter with optional UV lamp, electronic water meter and electronic timer

Recommended accessories

WATERBLOCK
Prevents accidental flooding caused by faults in the water supply line

NO SHOCK
Absorbs sudden changes in the water mains pressure if an autoclave is fitted

PRV
Reduces the water mains pressure
