

Reliable technology and powerful performance make the Niagara range an **ideal partner in the distribution of drinking water within large groups of people.**

Innovative solutions for drinking water

An efficient, practical and economical alternative to traditional bottled water, which is also completely environmentally friendly!

Unlimited water

Up to 250 litres of cold, still and/or sparkling water can be dispensed per hour, thanks to icebank cooling and cold carbonation technology; this is ideal for large-scale users.

Wide range, maximum versatility

Different solutions - floor-standing, counter-top and under-counter - to fulfill various usage requirements.

Superior quality

Standard: water pressure reducer, CO2 regulator for models with sparkling water and the use of AISI 304 stainless steel for the sensitive parts of the casing.

Filtration

The taste and smell of the water can be improved by fitting filters capable of removing sediment and chlorine.

NIAGARA

Professional water dispensers for large scale applications

Recommended accessories

Waterblock
Prevents accidental flooding caused by faults in the water supply line

No shock
Absorbs sudden changes in the water mains pressure if an autoclave is fitted

Recommended filters

F-CAL
Customized chlorine purifier filter, bacteriostatic, descaler with shut off head

F-MICRO
Customized anti-bacterial micro-filter, with shut off head

F 4C
4C Chlorine filter/purifier with head and shut off valve

NIAGARAIN

NIAGARA IN SUPER

A standard-bearer for practicality, efficiency and sturdiness.

- Hygiene**
Stainless steel dispenser casing and sink as standard, to guarantee maximum hygiene.
- Dispensing**
Internal taps, protected from environmental pollution. Continuous or intermittent dispensing.
- Maximum safety**
The safety valve prevents flooding caused by accidental faults inside the machine.
- Functionality**
Space for housing the filtration system and the CO2 cylinder for carbonated water inside the machine; easy maintenance via the front opening.
- Plus-optional**
- CU+ Safepath**
Through the use of this application, the cooler is free from bacterial contamination. Available on all versions.
- Stainless steel shell**
Machine body entirely in AISI 304 stainless steel.

				lt/h	dimensions
NIAGARA 65 SL				65	48x40,5x148 cm
NIAGARA 120 SL				120	48x40,5x148 cm
NIAGARA 180 SL				180	48x40,5x148 cm
NIAGARA 65 SL WG				65	48x56x148 cm
NIAGARA 120 SL WG				120	48x56x148 cm
NIAGARA 180 SL WG				180	48x56x148 cm

Ideal for worktops, bar counters or canteens.

- Efficiency**
It optimises dispensing and eliminates bottled water management, offering the same high performance levels as the floor-standing model but in a smaller space.
- Practicality**
The dimensions, and the depth measurement in particular, adapt perfectly to worktops in large and small restaurants.
- Drip trays**
The brand new "quick-fit" system is used to secure the tray to the machine firmly.
- Plus-optional**
- CU+ Safepath**
Through the use of this application, the cooler is free from bacterial contamination. Available on all versions.
- Stainless steel shell**
Machine body entirely in AISI 304 stainless steel.

NIAGARA 180 TOP WG				180	53,2x49,5x51

For hidden power.

- Space saver**
This space-saving product can be installed beneath bar counters or in remote corners.
- Customised dispensing**
A wide range of taps and drip trays is available, so that you can choose the combination best suited to your own requirements.
- Plus-optional**
- CU+ Safepath**
Through the use of this application, the cooler is free from bacterial contamination. Available on all versions.
- Stainless steel shell**
Machine body entirely in AISI 304 stainless steel.

NIAGARA 120 IN WG				120	35x48x50cm
NIAGARA 180 IN WG				180	35x53x50cm

Unrivalled performance for use in very large communities or public automatic supply points.

- Improved performance**
50 liters capacity ice bank, capable of forming 18 Kg of ice, 300l/h pump and 2.5 liters capacity carbonation device.
- Maintaining temperature**
The agitator motor includes a recycling water pump as standard; this maintains the temperature of the refrigerated water along the path from the machine to the dispensing point.
- Vertical design**
The cooler is designed to occupy the least possible space in various installation situations. It is also equipped with strong and practical side handles to facilitate positioning.
- Plus-optional**
- CU+ Safepath**
Through the use of this application, the cooler is free from bacterial contamination. Available on all versions.
