WATER TREATMENT

Filtration and separation solutions

www.deefine.cn

Company Introduction

Hangzhou Deefine filtration is one of the leading manufacturers of micro filter cartridges in China. We focus on designing, producing and marketing quality filtration products to global market. Our professional engineer team provides comprehensive technical support and also our best service.

Deefine filters are widely used in industrial water treatment, process water, seawater desalination, drinking water and so on.

Applications

Deefine cartridge filters are widely used in Seawater desalination, Reclamation Plant, Chemicals, Oil refinery, Coal Chemicals, Metallurgy and so on.

▼ Thermal Power Plant

▲ Chemical Industry

▲ Water Reclamation Plant

▲ Sea Water Desalination

High flow filter cartridges

■ HFP series

HFP series high flow filters have 6 inch outer diameter, single open end and a useful handle.

One piece of HFP is equivalent to several standard 2.5" pleated cartridge.

■ HFM series

HFM series high flow filters have large filtration area and high flow rate of up to 80 m³/h(40").

High flow filter cartridges

■ HFH series

HFH series have 152 mm(6") outer diameter, single open-ended, one or two O-rings.
The flow direction is outside to inside.

■ HFD series

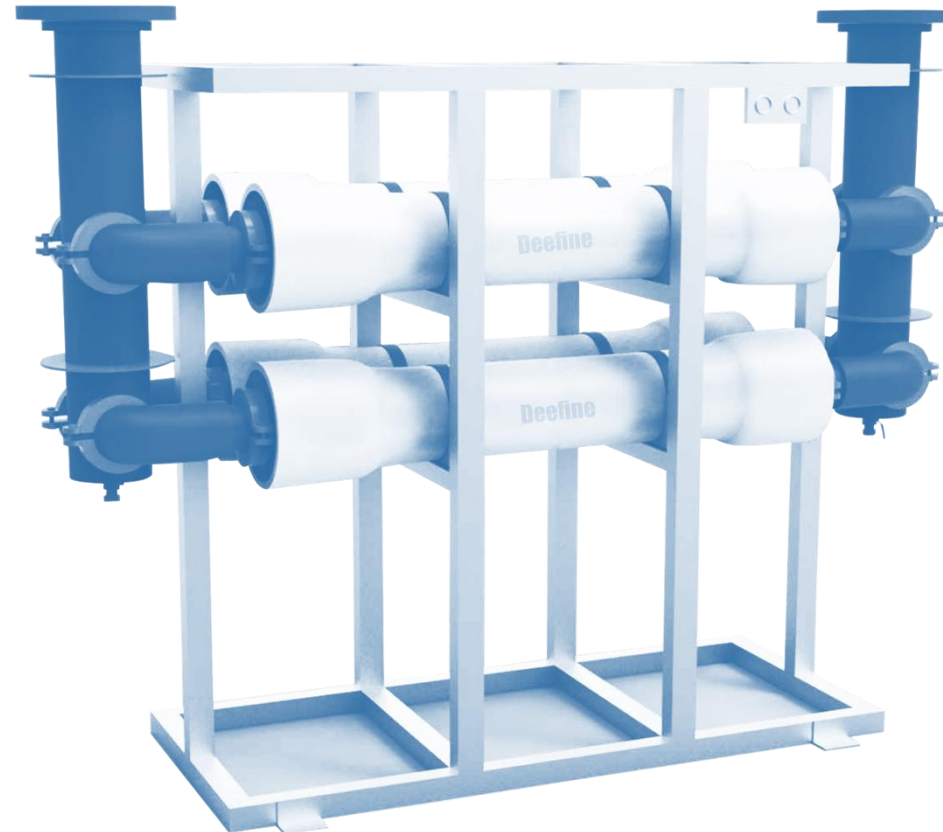

HFD series HFD is double-open-end filter cartridge, ideal for high flow water treatment.
Widely used in FRP housings.

High flow filter cartridges

■ HFT series

HFT series designed with tripod support and a convenient handle. This construction is very suitable to fit 8" FRP housings.

High flow filter cartridges

■ HF4 series

4" FRP housing with HF4 cartridge is ideal for small water system, cost-saving.

■ BF series

BF series are designed to replace filter bag size1 and size2.

PP pleated filter cartridge

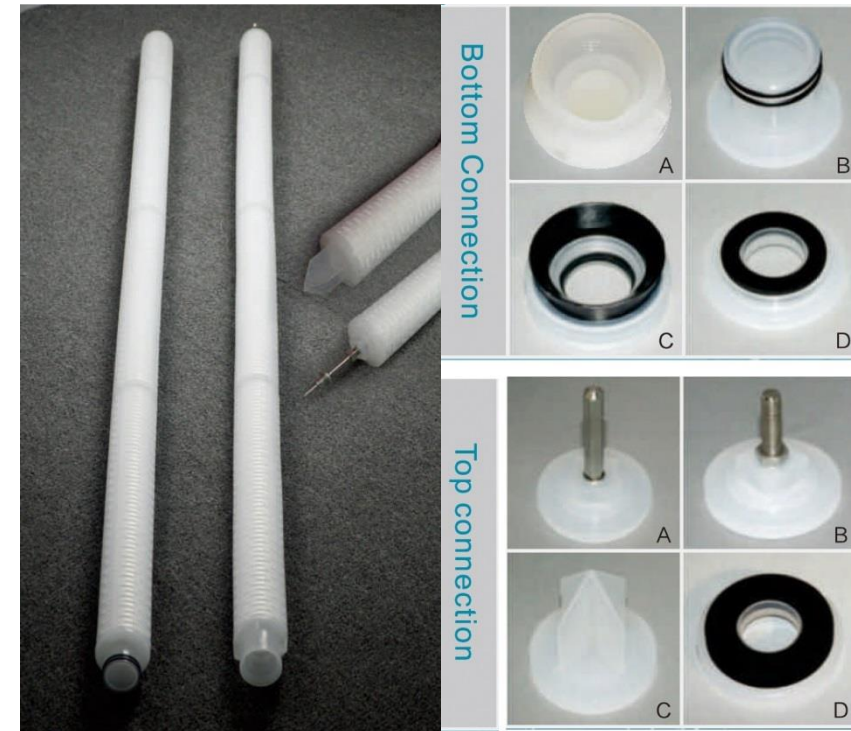

■ PP1 series

PP1 filter cartridges are pleated polypropylene depth filters. It's all PP construction without any adhesive.

■ PPN series

PP pleated cartridge, back-washable
Suitable for condensate water
