aquamor

Introducing. . .

our patented AQE POE System.

The most advanced
whole house,
point-of-entry
water filtration system
ever made.

Standard System Specifications

Component	Benefits
Multiple Gauges	Instant and continuous performance monitoring
Auto Flush	Increases life and improves UF Membrane performance
	Programmable for 1 to 20 flushes per day to account for various feed water qualities
Patented Modular Design	Filters can be arranged in parallel for greater flow rates
	Easily add/change filter types for required applications
WiFi/Bluetooth Controller	Allows for 24/7 remote monitoring and programming
20" UltraFiltration Membrane	Provides 5 gpm (20 lpm) flow
	0.02um UF Filtration
	99.999% Bacteria & Cyst reduction
	99.99% Virus reduction
Stainless Steel UltraFiltration Membrane Housing	Superior turbidity reduction
	Proprietary 316 SS UF Membrane Housing
High Capacity Carbon Block Filter	Rated for 250,000 gallons (950,000 liters) @ 5 gpm (20 lpm)
	Removes/Reduces chlorine, taste, and odors

System Components		Features
1	Differential Pressure Gauges	Provides immediate performance data
2	Auto-Flush	Programmable to maintain superior filtration
3	Clean Tank Flush	Flushes the UF Membrane with clean water
4	Patented Modular Mounting System	Allows for ultimate customization and expandability
5	WiFi/Bluetooth Controller	Provides 24/7 remote monitoring and programming
6	UltraFiltration Membrane	Proprietary UF Membrane provides 0.02um filtration
7	UltraFiltration Housing	Proprietary 316 SS Membrane Housing
8	High Capacity Quick Change Filter	Highest capacity quick change carbon block. Also available in many other configurations based upon filtration needs.
9	Custom Wall Mount Bracket	Modular and expandable wall mount bracket to allow for ultimate flexibility and customization.
