

# TECHNICAL SPECIFICATIONS

**Inlet temperature:** 5 – 35 °C

**Max. TDS input:** 1000 ppm

**Working pressure:**

- System with a pump: 1 to 3 Bar
- System without pump: 2,5 to 4,2 Bar

**System with pump:**

- Electrical voltage 220V – 24VDC
- LF-30L Pump

**Safety devices:**

- Protection valve
- Water stop system leak detection

**3,2 gallon metallic storage tank**

# FILTRATION PROCESS

**1<sup>st</sup> Stage:**

5 µm PP sediments in-line cartridge (CA-9006-02)

**2<sup>nd</sup> Stage:**

Granular carbon in-line cartridge (CA-9006-04)

**3<sup>rd</sup> Stage:**

Granular carbon in-line cartridge (CA-9006-04)

**4<sup>th</sup> Stage:**

Membrane 18x12 75 GPD (ME-2003-03)

**5<sup>th</sup> Stage:**

10" Antibacterial nano-cloth post-filter (OI-0205-20)

COMPACT REVERSE OSMOSIS  
FOR WATER OF DOMESTIC USE

# A SMALL INVESTMENT IN YOUR HEALTH AND WELL-BEING

Enjoying pure water at home is far less expensive than you could imagine. With a competitive price and a compact design which fits in any space, Nora is the reverse osmosis device perfect for you. The smart choice to supply your house with a low salt content water.

### SAVING

Nora fulfils your expectations with an affordable price. The quality of the water supplied will prevent from future problems for your coffee machine and other household appliances.

### PURITY

Low salt content water coming out from your faucet, as it removes between 96 to 97,5% of the dissolved salts.

### COMFORT

So compact you will only notice its benefits: a high flow of the purest water just by opening the tap. In addition, the installation and maintenance are simple and without further costs.

### HEALTH

You will not only notice a great improvement in the water's taste and quality straight away, but also its long term benefits for your body.

### DESIGN

Its high capacity storage tank is perfectly integrated in its compact design, which allows it to be hidden inside your cupboards where other equipment would not fit.

## TECHNOLOGY TO PRODUCE THE BEST WATER AT HOME

**High water flow**  
Thanks to its 75 GDP membrane and 3/8" tubing.

**High capacity storage tank**  
3.2 gallon water tank.

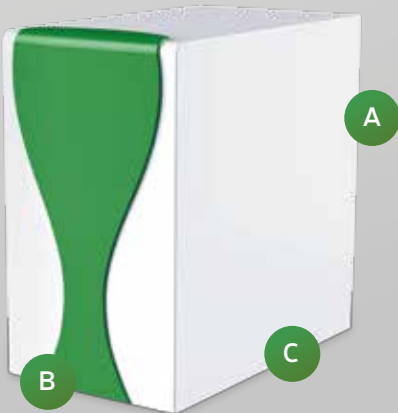

**Safety system**  
Accurate and proven leak detection system WATER STOP and a pressure regulator for devices with a booster pump.

**Antibacterial tubing**  
Prevents the proliferation of bacteria. Certified by SGS.

**European certificate of conformity**
