

TECHNICAL SPECIFICATIONS

- Cabinet:** blown polyethylene
- Bottle:** made of polyester reinforced with fiberglass (GRP) and internal PE liner
- Integrated hardness mixer**
- Turbine to control the volume of treated water**
- High capacity food grade resin** filler for high performance with NSF certification
- Regeneration:** by average consumption (variable reserve)
- By-pass** included
- Working pressure:** 2,5 a 6 Bar
- Temperature:** 4 to 43°C
- Electrical voltage:** 230V/12V 50Hz

SOFTENER AITANA		
MODEL	AITANA 8L	AITANA 30L
CODE	ED-0205-03	ED-0205-05
RESINE VOLUME	8 L	30L
FLOW	Nominal 0,3 m³/h	Nominal 1,2 m³/h
	Point 3,52 m³/h	Point 3,52 m³/h
SALT CONSUMPTION	150gr/l	150gr/l
CONNECTION	1"	1"
POWER SUPPLY	230V/12V 50Hz	230V/12V 50Hz

NO MORE LIME

SOFTENER AITANA
AUTOTROL 255-760
FOR WATER OF DOMESTIC USE

NO MORE LIME FOR YOU OR FOR YOUR HOME

Aitana is the optimal softener that transforms hard water from the net in soft water, avoiding lime scale in pipes and breakdowns in your home appliances.

Soft water will benefit your home, saving up to 50% on cleaning products. The faucets and bathrooms will look shiny and like new.

You will also notice the benefits on your skin, your hair and your clothes, leaving everything much smoother.

SOFT WATER FOR GLOSSY DISHES
Lime stains dirtying cutlery and glassware are reduced because the water that you use at home will have much less lime.

SOFT SKIN AND HAIR
With the Aitana softener in the house water inlet, lime will not dry out skin and hair. You'll spend less on soaps, hair softeners and skin products.

SOFTER CLOTHING
The benefits of soft water are appreciated in the softness of the clothes after drying. You'll save money in clothing softeners.

APPLIANCES AND FAUCETS LONG LIFE + SAVINGS
Washing machines and dishwashers with lime accumulated in the joints, heating boilers dirty with lime, faucets with white lime build up ... The softener Aitana lengthens the life of all objects through which water circulates.

VALVE AUTOTROL 255-760 LATEST GENERATION PROGRAMMER
760 electronic volumetric programmer, easy to program, with delayed regeneration. Control of the regeneration in a volumetric and statistical way, anticipating the average daily consumption to guarantee maximum effectiveness. Salt consumption of 150gr salt / liter of resin. Allows the programming of forced regeneration.

SOFTENER AITANA AUTOTROL 255-760 FOR HOUSEHOLD WATER

-  **Technology and innovation**
The best technology of the AUTOTROL brand with the 255-760 valve
-  **Maximum control**
Digital programmer with multiple programming possibilities to adapt to consumption of water from your home
-  **Efficiency and saving**
Common equipment with advanced technology of high efficiency in regeneration. Low salt consumption: 150gr / liter of resin
-  **Easy installation and maintenance**
-  **European Certificate of conformity**
